

WATERHOUSE GARDENS CASE STUDY

Matic Building Services

Background

Waterhouse Gardens is a landmark regeneration project near central Manchester, bridging Greengate, N.O.M.A., and the Medieval Quarter. Matic is delivering a full M&E fit-out across 556 luxury residences, integrating cutting-edge engineering to ensure comfort and quality. Waterhouse Gardens signals Manchester's future of where innovation meets community-driven design.

Products Supplied by: Pinnacle Electrical

Solutions Implemented

Hispec was pleased to deliver a comprehensive alarm solution for the project:

HSSA/PE/FF10 smoke alarms and HSSA/HE/FF10 heat alarms were an ideal fit for a project of this scale and complexity.

Matic Building Services, a highly regarded mechanical and electrical expert with extensive experience in major developments, oversaw the installation. The alarms were supplied through Pinnacle Electrical, ensuring seamless logistics and consistent product availability from start to finish. With successful commissioning complete, the Matic team now shifts focus to the remaining blocks.

Why Hispec?

Waterhouse Gardens posed notable challenges due to its scale and the intricacies of working within a historic setting. Our choice of alarms was driven not only by their proven reliability and quality, but also by their ease of installation and seamless integration into the wider fire safety infrastructure.

"This project benefited greatly from the integration of Hispec alarms, which delivered seamless installation and unwavering performance throughout. The high-quality design and dependable functionality consistently exceeded expectations, making them a stand-out choice."

– Pinnacle Electrical

A Safer Future for Waterhouse Gardens

Hispec is honoured to contribute to the safety of future residents and visitors in this neighbourhood. Our participation in initiatives like this underscores our steadfast dedication to delivering high-performance fire safety solutions.
